✉ deepshikha01081999@gmail.com

PROFILE INFO

Software Engineer with 3+ years of experience in full-stack development, specializing in React, Node.js, and API architecture. Experienced in building interactive applications and optimizing system performance. Currently deepening expertise in Machine Learning, data-driven systems, and scalable software design.

EDUCATION

2017-2021

RUNGTA INSTITUTE OF
TECHNOLOGY

- Bachelor of Technology in
Computer Science

SKILLS

- Node.js
- API development
- React.js
- Basic Machine Learning &
Deep Learning
- Web development
- Indie Games

LANGUAGES

- Javascript (Current)
- Python (Current)
- C++ (Used in Past)
- Java (Used In Past)

DATABASES

WORKED ON

- Neo4j (understandable)
- Mongo DB (intermediate)
- mySQL (basic)

WORK EXPERIENCE

IBM India

2021-2024

Fullstack Developer

- Designed and implemented RESTful APIs as middleware to enable secure data integration between legacy systems and client platforms.
- Led data migration initiatives, transforming and validating structured data to ensure consistency and integrity across systems.
- Modeled and managed graph-based data structures using Neo4j to optimize relationship-driven queries.
- Collaborated with stakeholders to analyze business requirements and translate them into scalable backend solutions.
- Improved system interoperability by streamlining cross-platform communication workflows.
-

SELF GROWTH

IIT Delhi

JAN 2025- SEPT2025

Machine Learning and Deep Learning
Foundation Course

- Learned the Foundation of Machine Learning and Deep Learning
- Created a small project of Number identification

React - The Complete Guide (incl. Next.js, Redux) (Udemy)

Machine Learning Algorithms in Python (Udemy)

SMALL & MIDSIZE TECHNICAL PROJECTS

Digit Recognizer

https://github.com/Deepshikha1999/Digit_Recognition

- Built a machine learning-based application to identify and classify handwritten digits with high accuracy.
- Processed visual data through neural network layers, bridging the gap between raw pixel input and digital output.
- Key Tech: Python, Machine Learning, Computer Vision.

BasicAlgo Games

<https://basicalgo.netlify.app> | https://github.com/Deepshikha1999/React-Small-projects/tree/main/basic_algorithm_concepts

- Developed a suite of interactive games designed to visualize and teach fundamental computer science algorithms (Searching, Sorting, Pathfinding).
- Transformed complex data structures into engaging user experiences, improving conceptual learning for developers.
- Key Tech: React.js, Data Structures, Algorithm Visualization.

PhotoCards Maker

<https://photooshoot.netlify.app/> | https://github.com/Deepshikha1999/React-Small-projects/tree/main/photo_puzzle

- Created a dynamic web utility for users to design, customize, and generate personalized greeting cards and photo puzzles.
- Implemented image manipulation and state-driven UI to handle user-uploaded assets and layout configurations.
- Key Tech: React.js, CSS Canvas/Flexbox, State Management.

Pixel Canvas (DoodlePixies)

<https://doodlepixies.netlify.app/> | https://github.com/Deepshikha1999/React-Small-projects/tree/main/build_characters

- Designed a grid-based drawing platform focused on retro pixel art, allowing users to build and export character sprites.
- Optimized a high-frequency coordinate system to track and update individual pixel data in real-time.
- Key Tech: React.js, Grid-Systems, Real-time UI Rendering.
